Question Answering Task

The goal is to predict **short** and **long** answer responses to real questions about Wikipedia articles

Long answer

Sequence classification task

Classify each given paragraph if it's the right answer.

Responsible: Misha

Short answer

Token classification task

Classify each token of the right long answer if it belongs to the short answer (with BIO-tagging)

Responsible: Yana

Progress

Done

- Data readers for short & long answers
- Code for training short & long answer models
- Code for evaluating the models
- Trained on a small subset of data to prove code works

To Do

- Train both models
- Make minor fixes and improvements in training code
- Evaluate the models
- Upload the submission on Kaggle

PROBLEMS

- Can't register on Kaggle with Russian phone number
- Can't access exact input data because of this
